With the exterior made by green material GRG and the blue glass inside, the whole building standing in our sight is unique and inimitable!

设计师用绿色GRG材料搭建的造型外观内衬蓝色玻璃, 使整个建筑凸显在人们的视线之中。

In view of purchasers' feet in summer, the concept of "Transparence" naturally came into being. In such a season, it's also easier to retain customers in the space by "Transparence". With the exterior made by green material GRG and the blue glass inside, the whole building standing in our sight is unique and inimitable!

More designer's ideas will be found out when you step into the room: white and blue is everywhere here, filling each corner; moreover, a straw yellow is softly embellishing the peaceful space, which enriches and modernizes the structure and interfaces in no time. On the floor, various dark and light colors change to draw patterns, meanwhile, reflect themselves in exactly same places of the ceiling. The gradation of the space is perfectly shown too.

该售楼处销售期恰好处于夏季, 考虑到购买者的心理感受, “透”的设计理念油然而生。在这样的季节里, “透”也更容易把客户留在这个空间中。因此, 设计师用绿色GRG材料搭建的造型外观内衬蓝色玻璃, 使整个建筑独立地屹立在人们的视线之中。

入室后, 人们会发现设计者心思的巧妙。白色和蓝色的结合充斥着一个细节, 而一抹芥末黄色又悄悄地点缀着这个静谧宁静的空间, 使形体和界面立刻丰富起来。室内地面通过深浅不一的颜色变化勾勒出图案, 同时反射在相同位置的天顶上, 空间的层次在这也得到体现。
