In light of buyers' psychological feelings in the development's sales season of summer, the style of transparency is emerged as the time requires. In addition, transparency style makes it possible for buyers to stay longer. Constructed with environment-friendly materials GRG, and complemented by blue glass, the surprising structure appears vividly, leaving people unforgettable impressions. Furthermore, there are

more surprises inside the structure representing the designer's unique and original concept. The combination of white and blue penetrates every corner of the space, yet the colour of mustard yellow adds a vibrant touch to this calm and sophisticated space. Contrasting colours compose different blocks on the floor, creating the echo with ceiling patterns, therefore spatial depth is achieved.

由于该楼盘的销售期处于夏季,考虑到购买者的心理感受,“透”的意味应运而生。此外,在这样的季节里,“透”也更容易让客户在空间中驻足停留。该售楼中心由绿色材料 GRG 搭建而成,并衬以蓝色玻璃,以其新颖的造型出现在人们的视线中,给人留下深刻印象。进入室内,其内部的设计更是惊喜连连,表现出设计师独到的理念

和手法。白色与蓝色的搭配充斥着空间的每一个细节,然而并未黄的运用又为这个沉稳、冷静的空间添加了令人为之心动的一笔,使空间富于动感和生命力。地面的设计采用深色和浅色的对比勾勒出不同的块面,与天花图案相对应,表现出空间的层次感。
